

THROBBING HEART, PULSING VESSELS, BLOOD LEAKING FROM A WOUND – THE CARDIOVASCULAR SYSTEM IMPACTS DEEPLY ON OUR CONSCIOUSNESS. EVERY PART OF THE BODY RELIES ON A STEADY FLOW OF LIFE-GIVING BLOOD. THAT MOST VITAL OF PUMPS, THE HEART, IS MOSTLY MUSCLE AND, IF MALTREATED, IT CAN WEAKEN AND WASTE, COMPROMISING ITS OWN BLOOD SUPPLY. DISORDERS OF THE HEART AND CIRCULATION ARE GENERALLY CAUSED BY ABUSE AND EXCESS: SMOKING TOBACCO, OBESITY, AND TOO LITTLE EXERCISE.
