

THE LIVING SKELETON, WITH ITS VARIETY OF SPECIALIZED JOINTS, IS INTIMATELY CONNECTED WITH THE MUSCULAR SYSTEM. IT PROVIDES A FRAMEWORK OF STIFF LEVERS AND STABLE PLATES THAT PERMITS A MULTITUDE OF MOVEMENTS. THE SKELETON ALSO INTEGRATES FUNCTIONALLY WITH THE CARDIOVASCULAR SYSTEM – BONE MARROW CEASELESSLY MANUFACTURES FRESH BLOOD CELLS THAT POUR INTO THE BLOODSTREAM. A HEALTHY DIET AND REGULAR EXERCISE CAN HELP TO REDUCE THE RISKS OF BONE AND JOINT DISORDERS.
