

**Back stretch:** get on all fours and lower your bottom toward your feet while stretching your arms in front of you. Lower your forehead, keeping your neck and back aligned, and stretch your arms. Inhale slowly and then relax your back and arms as you exhale. Inhale and exhale 10 times.

**Leg stretch:** sit on the floor and stretch your left leg in front of you. Using your left hand, take hold of your left foot for a few seconds. If you can't reach your toes, don't worry. Inhale to begin and exhale as you stretch. Repeat with your right leg.
