

utensils and work surfaces.

- Keep your fridge below 41° F (5° C). Keep food chilled until you prepare it.
- Cook food thoroughly and serve it hot. Red meat must reach 160° F (70° C) internally and the juices must run clear when you insert a sharp knife.
- Refrigerate leftovers immediately, and reheat until piping hot, only once.
- Cook prepared meals thoroughly, until they are piping hot, especially if they contain poultry.
- Use food before the use-by date.
- Wash fruit and vegetables fully.
