

eggs, and make sure all poultry is thoroughly cooked through, since cooking kills the bacteria.

HOW MUCH CAFFEINE?

Recent research indicates that there is no absolute safe level of caffeine, so current advice is to limit caffeine consumption to less than 200mg a day, which is equivalent to 2½ cups of instant coffee. High levels of caffeine is associated with an increased chance of having a miscarriage or a small baby. Be aware of how much caffeine drinks and chocolate contain:

- 7fl oz (200ml) instant coffee: 75mg
- 7fl oz (200ml) filter coffee: 140mg
- 8fl oz (225ml) latte: 75mg
- 8fl oz (225ml) flat white: 150mg
- 7fl oz (200ml) black tea: 33–50mg
- 11½fl oz (330ml) regular cola: 32mg
- 11½fl oz (330ml) diet cola: 42mg
- 9fl oz (250ml) energy drink: 80mg
- 1¾oz (50g) bar of plain (dark) chocolate: less than 25mg or milk chocolate: less than 10mg
