

Although your clothes may be feeling a little tight by this stage, you probably aren't ready to wear voluminous maternity clothing just yet, so it's time to get creative! Simply bridge the gap between your button and button-hole with an elastic band or by sewing in an elastic panel. Assuming your partner is bigger than you, try raiding their wardrobe—their T-shirts, shirts, and sweaters can be gathered in with a low-slung belt.

Check what's in your wardrobe already: empire-cut dresses will see you through most of your pregnancy; looser smock tops can be layered over tight-fitting T-shirts; low-slung pants can sit neatly under your belly, topped with an oversize shirt. You might want to buy a pair of maternity pants—something stretchy with an adjustable waist.
