

Your 15th week

START TALKING TO YOUR BABY—THEY CAN HEAR YOUR VOICE.

Amazingly, your baby's ears have formed enough for them to hear you speaking. They'll recognize your voice—and your partner's—when they come out into the world. Like many pregnant women in the second trimester, you may now be reaping the benefits of the pregnancy “glow” as hormones improve the appearance of your skin and hair. Enjoy this time and the attention that often comes with it.
