

In this computer-generated image, the internal organs of the fetus can be seen. The skull, spine, and rib cage are also clearly visible. The lungs (pink) are protected by the rib cage; the kidneys (red) are below.

GIVING YOUR BABY ENERGY

You are constantly giving to your baby throughout pregnancy, and he gets all the energy he needs from you. Glucose from your bloodstream is transported from your blood to the baby's bloodstream through the placenta. Your blood sugar level is higher than your baby's to help this process. Protein in the form of amino acids (the building blocks of protein) are actively
