

connects the heel to the ball of the foot becomes inflamed.

- **Avoid wearing high-heeled shoes.** In addition to being uncomfortable, they may make you unsteady on your feet and cause you to fall.
- **Ensure that your shoes fit** correctly and invest in new ones if not. Some pregnant women's feet expand by a size and never return to their normal size after pregnancy.
- **Get regular exercise,** and avoid standing for long periods. Take regular breaks if your job involves standing.
