

An increase in vaginal discharge is also nothing to worry about, but if it has a strong odor or is yellowish or greenish in color, you could have an infection so see your doctor. To stay smelling sweet:

- **Shower or bathe like usual** and apply deodorant. Carry handy wipes with you.
- **Switch to body sprays** and lotions; they tend to be lighter than perfumes and are less likely to cause headaches.
- **Avoid wearing tight clothing:** wear loose clothes in natural fabrics, which absorb sweat and allow your skin to breathe.
- **Wear cotton underwear,** and change it more often, if necessary.
- **Use disposable panty liners,** if needed, to stay feeling fresh.
