

ASK A DOCTOR

I plan to bottle-feed. What do I need to buy in advance? You'll need plastic bottles (nipples are included), a sterilizing unit or kit (see [Bottle-feeding](#)), which often has everything you need, and your preferred formula. Each comes in a range of options, so you need to decide what works best for you.

As you get to know your newborn baby, you may have to change the type of nipple and/or formula, so it's not advisable to buy too many before the birth.
