

Calcium from your diet crosses the placenta and is used to help strengthen your baby's bones.

With bottom up, head down, and chin tucked into the chest, a baby is in an ideal position for the beginning of labor. Of course, not all babies are so obliging.

Fingernails have grown long enough to reach the tips of the fingers.

The amniotic fluid swallowed by the baby passes through the stomach and intestines in the same way that food travels through a mature digestive system. Waste is stored in the baby's colon to be excreted after birth.

At 33 weeks the average crown to heel length is 17.2 in (43.7 cm) and the average weight is 4.2 lb (1.9 kg).
