

The fundus, or top of the uterus, is high in your abdomen and the pressure under your ribs may make it impossible for you to enjoy a full meal without discomfort.

The amount of amniotic fluid surrounding the baby varies in individual pregnancies. At this stage, the fluid has reached its maximum level.

Your baby's gut would be able to process food if they were to be born this week. All the digestive enzymes are now active.

The position of the baby is unlikely to change between now and the birth if this is your first pregnancy.

At 34 weeks the average crown to heel length is 17.7 in (45 cm) and the average weight is 4.7 lb (2.1 kg).
