

YOU ARE **34 WEEKS AND 6 DAYS**

36 days to go

YOUR BABY TODAY

The placenta, shown in red above the baby's green profile, is now receiving 18 fl oz (0.5 liter) of blood each minute from your circulation. In order to accommodate this increase, your blood volume expanded dramatically in the first few months of the pregnancy.

“ It’s never too late to improve your fitness, and whatever you do now will serve you well in labor. ”

You might be in the final few weeks, but you will want to stay active. Exercising regularly and consistently will enable you to reap the rewards of your efforts: increased fitness, higher self-esteem, and much more energy.

Find activities that you enjoy: swimming and walking are often favored by pregnant women in this late stage. As well as helping to improve fitness, both of these activities will help you to relax and unwind.

Always listen to your body and stop if you feel that you are over-exerting yourself.
