

Have you done everything on the to-do list? This may include:

- **Buying a car** seat and making sure you know how to install it safely in the car. You can't leave the hospital with your newborn without one.
- **Assembling the crib** if you're going to use one in the early weeks.
- **Making sure there is storage** space for the baby's clothes, bedding, diapers, and other bits and pieces.
