

Everyday activities, such as climbing the stairs, are likely to take longer and be more tiring in the final weeks of pregnancy.

VBAC

Doctors used to think that if you had one baby by Cesarean, all future babies must also be born that way. But doctors now know that 90 percent of women who delivered by Cesarean are candidates for VBAC, or Vaginal Birth after Cesarean. Depending on the reason for your prior Cesarean, you may be able to deliver vaginally, especially if you have no major medical
