

Although your goal is to conceive, try to stay relaxed and make sure sex remains a pleasure and not a chore.

SEXUAL POSITIONS

It seems that how you have sex can help conception. Sexual positions that maximize penetration, such as rear entry, may work best since sperm is deposited as close to the cervix as possible. If the man is on top, the woman could try placing a pillow under her buttocks to raise her pelvis and help the movement of sperm toward the cervix. Woman-on-top positions may lead to leakage of sperm. Avoid using lubricants because they can adversely affect sperm.
