

2nd and 3rd stages

THE MOMENT OF DELIVERY IS ALMOST HERE AND YOU WILL SOON MEET YOUR LONG-AWAITED BABY.

The second stage begins when your cervix is fully dilated and your baby has moved deep into the pelvis. These signs may be accompanied by an overwhelming urge to bear down and, once your doctor is satisfied that you are ready to do it, you will be able to push your baby out. The third stage, the delivery of the placenta, marks the end of labor.
