

George and Robert Stephenson

1825

The Stephensons build the Stockton and Darlington Railway. Although it was built for transporting coal, it also carries passengers.

1830

The world's first passenger railway opens with locomotives built by the Stephensons, including the *Rocket*.

1848

George dies, aged 67. By this time, nearly 40,000 miles (65,000 km) of railway have been built. Robert dies in 1859, aged 55.
