

CAFÉ CULTURE

In the early 1990s, nobody had access to the Internet at home. In 1991, a number of cafés in San Francisco had computers that were connected to other cafés. The first café with full Internet access arrived in early 1994 at the Institute of Contemporary Arts in London.

Users at Vietnam's first cyber café, 1996

Web browsers enable users to view pages on the Internet.

GLOBAL NETWORKS

Online communities have existed since before the World Wide Web. However, they became more popular with the arrival of sites such as Classmates (1995), Six Degrees (1997), LinkedIn and MySpace (both 2003), Facebook (2004), and Twitter (2006).

▲ BUILDING WEBSITES

The arrival of website-creation platforms such as WordPress, launched in 2003, has made it easy for users to create their own websites.

World Wide Web

The WorldWideWeb (W3) is a wide-area, [hypertext](#) information retrieval initiative aiming to give universal access to a large universe of documents.

Everything there is online about W3 is linked directly or indirectly to this document, including an [executive summary](#) of the project, [Mailing lists](#), [Policy](#), [November's W3 news](#), [Frequently Asked Questions](#), [What's out there?](#), [Pointers to the world's online information](#), [subjects](#), [W3 servers](#), etc.

Help

on the browser you are using.

Software Products

A list of W3 project components and the current state. (e.g. [Line Mode](#), [X11](#), [Viola](#), [SixXTStep](#), [Servers](#), [Tools](#), [Mail robot](#), [Library](#))

Technical

Details of protocols, formats, program internals etc:

Bibliography

Paper documentation on W3 and references.

People

A list of some people involved in the project.

History

A summary of the history of the project.

How can I help?

If you would like to support the web.

Getting code

Getting the code by [anonymous FTP](#), etc.

THE FIRST WEB PAGE

The first ever web page, above, went live on August 6, 1991. It was made by Tim Berners-Lee. He shared information about the World Wide Web project and outlined how to create web pages.

WORDS AND PICTURES

Early websites only had words, no pictures. In 1993, the National Center for Supercomputing Applications at the University of Illinois released Mosaic—an interface, or browser, that supported graphics. Websites now looked much more appealing and were easier to read. Mosaic helped to popularize the World Wide Web.

WOW!

There are more devices connected to the Internet than there are human beings living on Earth.
