

▲ IN HER LABORATORY

Marie Curie works in her laboratory at the Sorbonne University in Paris, France, in 1911.

LIFE STORY

1867

Marie Skłodowska is born on November 7 in Warsaw, Poland. As a teenager, she studies science in secret at the Flying University.

1891

She moves to Paris to study and meets Pierre Curie, a professor at the Sorbonne University. They later marry, in 1895.

1897

Her first daughter, Irene, is born. She also becomes a scientist, winning a Nobel Prize in Chemistry in 1935.

Irene Curie

1903

The Curies are awarded the Nobel Prize in Physics, making Marie the first woman to achieve this honor.
