

3-D PRINTING

We have barely begun to discover what 3-D printing can do. The process of feeding a digital 3-D design into a computer, which then instructs a machine to create the object with plastic, is limited only by our imaginations. Today, some hospitals print replacement body parts, engineers print houses, and the US luge team at the 2018 Winter Olympics rode sleds which were 3-D printed. Who knows what will come next?
