

Liver

Gall
bladder

08:00:00
Watery waste
leaves the small
intestine and enters
the large intestine

Stomach

Small
intestine

Large
intestine

Rectum

Anus

06:00:00
Food is fully
digested

32:00:00

Feces arrives in the rectum
20 to 44 hours after eating

Taking time

It takes about a day and a half for food to pass through the body. This allows enough time for the food to be digested completely and for nutrients to be absorbed into the bloodstream.
