◀ CHINESE 32-POUNDER

Date 1841

Origin China

Weight 4.84 tonnes (5.3 tons)

Length 2.74m (8¾ft)

Calibre 19cm

Engravings on the breech indicate that this imposing bronze 32-pounder was cast in August 1841, during the reign of Chinese Emperor Daoguang (1820–50), for coastal defence duties.

▼ BRITISH 9-POUNDER FIELD GUN

Date 1876

Origin UK

Weight 1.04 tonnes (1.14 tons)

Length 1.79m (5¾ft)

Calibre 3in

Field guns like this muzzle-loading rifled British 9-pounder played an important role in both sieges and field battles in the British Army's overseas engagements of this period.

▲ BLAKELY RML MOUNTAIN GUN

Date 1865

Origin UK

Weight 363kg (800¼lb)

Length 1m (3¼ft)

Calibre 2.75in

In mountainous terrain, armies needed lighter, more manoeuvrable field guns, and mountain guns were developed to meet this need. This gun, manufactured by the innovative Blakely Ordnance Company, has a steel barrel with six-groove rifling and reinforcement at the breech in the form of an additional steel tube ("jacket").

Reinforced ammunition cases

▼ ARMSTRONG RML 12-POUNDER

Date 1878

Origin UK

Weight 415kg (915lb)

Length 2.23m (7¼ft)

Calibre 3in

The initials RML in the gun title stand for "rifled muzzle-loader". This steel 12-pounder was manufactured by Armstrong in Newcastle, northern England, for merchant marine use.
