

Nut butter

Shea

*Fatty seeds are used to make shea butter, a popular moisturizer.*

Lavender

*Dried flowers are used to extract oil.*

*The fragrant oil has soothing, healing qualities.*

Cocoa

Dried cocoa beans

*Cocoa butter, made from the crushed insides of cocoa beans, is melted to make body creams.*

*This thick, fleshy leaf has a gel-like sap inside.*

Aloe vera

**Goats** climb argan trees to eat the fruit and **disperse** the seeds in their droppings.

Argan

*Oil extracted from the seed nourishes skin, hair, and nails.*

Body scrub mixed with argan oil

*Clear leaf sap is added to many skin care products for its soothing properties.*

Inside an aloe vera leaf

*Bath bombs infused with eucalyptus oil nourish hair and soothe the skin.*

Eucalyptus bath bombs

Eucalyptus

natural antiseptic and healing qualities. While the seeds of the **shea** nut, kernels of the **argan** fruit, and **cocoa** beans must all be roasted in order to release their rich oils, the seeds of the **jojoba** plant can simply be crushed. It is the leaves of the **henna** plant that, when dried and mashed

to a paste, release a strong orange-brown dye. The sap inside the thick spiky leaves of the **aloe vera** plant is not only a soothing gel for burns but also has moisturizing properties. Cleopatra, the queen of ancient Egypt, attributed her great beauty to her use of aloe vera!
