

Horse chestnut

These glossy seeds are protected by a spiky shell.

These massive seeds are the largest and heaviest in the world, weighing up to 39 ½ lb (18 kg) each.

Flat, circular seeds are a good source of protein.

Lentils

Javan cucumber

Coco de mer

deter hungry animals, while other seeds, such as those of the **avocado** and **peach**, are too hard for most plant eaters to munch. Sometimes, what we think of as seeds are, in fact, fruits with seeds inside, including those of the **sunflower**, **coriander**, and **pot marigold**.
