

DEFEND THE WALL!

Builders are putting the finishing touches on a new guard tower, and some of the sentries are almost dozing off when suddenly a warning cry rings out: "Raiders!" Mongol troops are launching a daring attack and the Chinese soldiers must scramble to fight them off.

1 Forest

These trees give cover to approaching attackers. But the trees next to the Wall have been cut down.

2 Watch out!

An eagle-eyed soldier in the guard tower sees the enemy coming and raises the alarm.

3 Raiders

The Mongols, from the region north of the Great Wall, were China's most dangerous foes.

4 Crossing over

The Mongols cleverly use ladders laid flat to cross the deep trenches in front of the Wall.

5 Surprise attack!

Very sharp Mongol swords can easily cut through the guard's protective armor.

6 Guard tower

The "command center" of each section of the Wall houses food, weapons, and armor.
