

An aerial photograph of the Taj Mahal in Agra, India, taken during the "blue hour" of dusk. The main mausoleum, a large white marble building with a central dome and four minarets, is brightly lit from below, creating a strong contrast with the deep blue twilight sky. The reflecting pool in the foreground is calm, mirroring the illuminated structure. To the left, the white marble gateway (Darwaza-i-Bahar) is also visible. The surrounding landscape is dark and silhouetted, with a few distant lights visible on the horizon. The overall mood is serene and majestic.

Commissioned by Mughal emperor Shah Jahan as a mausoleum for his wife Mumtaz Mahal, the white marble Taj Mahal in Agra is considered to be the pinnacle of Indo-Islamic architecture. Begun in 1632, the perfectly symmetrical building took 16 years to complete.
