

1817

FIRST CHOLERA PANDEMIC

An outbreak of cholera in Bengal in 1817 spread across India, and gained attention in the West when hundreds of thousands of Indians and around 10,000 British troops died. The pandemic reached China, Indonesia, and the Caspian Sea before receding. It was the first of several cholera pandemics to ravage the world in the 19th century.

RUSSIA ANNEXES NORTH CAUCASUS

The invasion of the Caucasus by the Russian Empire began a series of conflicts against the native Circassian peoples of the Caucasus that lasted until 1864. Many Muslims from the Caucasus were massacred or forcibly deported, most of them to Anatolia.

1819 Spain cedes the Pacific Northwest and Florida to the US; New Spain’s (Mexico’s) boundaries are set

1818

END OF THE MARATHA CONFEDERACY

After dominating a large portion of the Indian subcontinent during much of the 18th century, the Hindu Maratha Confederacy came under pressure from the British in the 19th century. It lost control of Delhi in 1803 and was broken by the surrender of Peshwa Bajirao II to the British East India Company in the Third Anglo-Maratha War, opening the way for British domination in India.
