FIRST MODERN OLYMPIC GAMES

Under the International Olympic Committee (IOC), the Ancient Olympic Games were revived in a modern form and staged in Athens. Male athletes from around the world (but mainly Europe, Chile, Australia, and the US) took part, competing in events such as track and field, shooting, gymnastics, cycling, and fencing.

241 athletes took part in the first modern Olympic Games

1896 The US Supreme Court upholds racial segregation in public places in the Plessy v Ferguson case

1897 Greece and the Ottoman Empire go to war over the status of Crete

1899 Sigmund Freud, an Austrian psychoanalyst, publishes *The Interpretation of Dreams*

1898 The physicist Marie Curie isolates the radioactive elements polonium and radium

**1867-1934
MARIE CURIE**

Born in Poland, physicist Marie Curie was famous for pioneering work on radioactivity. She discovered radium and polonium and, in 1903, won the Nobel Prize for Physics jointly with her husband.

**1898
US DECLARES WAR ON SPAIN**
Tensions between the US and Spain over Cuba grew when the USS *Maine* exploded in Havana harbour. Blaming the Spanish, the US sent troops to support Cuba's struggle for independence. Spain capitulated ten weeks later. Cuba gained independence, although US forces remained in Cuba, finally taking over the country in 1902.
