

- 4** Make sure to **embroider** a mirror image of facial features and body parts on the second animal piece so that when you stitch the two together you have the correct features on both pieces.

- 5** Using **blanket stitch** (see p.224), sew together the two halves of the body, leaving a small hole through which you can stuff it.

- 6** **Lightly stuff the animal** with the toy filling. Use the end of a pencil to work the filling into all the corners that are otherwise difficult to stuff. When you have finished stuffing the animal, use blanket stitch to sew up the hole.

- 7** **Join the elephant's trousers** at the sides and the crotch. Slip the trousers on his body. Attach the straps at the front and back and finish by sewing on a white circle of hole-punched paper for the buttons. Use the instructions opposite as a guide for the other animals.
