- 98 1730–1750
- 100 1750–1770
- 102 Studying weather
- 104 The Little Ice Age
- 106 1770–1790

Traveling through time

The earliest events in this book took place a very long time ago. Some dates may be followed by the letters “MYA,” short for “Million Years Ago.” Other dates have BCE or CE after them. These are short for “Before the Common Era” and “Common Era.” The Common Era began with the birth of Christ. Where the exact date of an event is not known, the letter “c” is used. This is short for the Latin word *circa*, meaning “round,” and indicates that the date is approximate.
