

Celestial atlas

This atlas of the heavens (*Atlas Coelestis*) was published in 1729—ten years after the death of its author John Flamsteed, Astronomer Royal of Great Britain. It is based on his detailed observations of 2,935 stars visible with a telescope from the Royal Observatory at Greenwich. *Atlas Coelestis* was one of the first major atlases to be based on observations through a telescope, and was considered much more accurate than previous star atlases.
