

dorsum of nose

Protruding median line of the nose extending from the root to the lobe.

root of nose

Portion of the face between the eyes from which the nose protrudes.

tip of nose

Round protuberance formed by the lower terminal part of the nose.

septum

Thin cartilaginous wall separating the two nasal fossae; it is an extension of the bones of the nose.

philtrum

Small cutaneous depression extending from the lower part of the nose to the upper lip.

naris

Outer orifice of the nasal fossae lined with hairs that filter inhaled air, thus preventing the penetration of foreign bodies.

ala

Lower cartilaginous portion of the side of the nose next to the nostril.
