

cervical vertebra

One of the bones of the neck forming the upper terminal part of the spine.

**transverse foramen**

Opening through which blood vessels and nerves pass.

thoracic vertebra

One of the bones of the spine that support the ribs, located between the cervical and lumbar vertebrae.

**lumbar vertebra**

One of the bones of the spine, larger than the other vertebrae, located between the thoracic vertebrae and the sacrum, that support a major portion of the body's weight.

spinous process

Posterior middle protuberance of the vertebra; the attachment point for the back muscles.

transverse process

Bony protuberance extending laterally from each side of the vertebra; the muscles are attached to it.

vertebral foramen

Cavity through which the spinal cord passes.

vertebral body

Anterior bony cylinder of a vertebra surrounded by two transverse processes.
