

lymph node

Small organ, located along a lymphatic vessel, that filters and cleans the lymph before it passes into the blood-circulation system.

germinal center
Each of the small mass of white blood cells located in a lymphatic ganglion.

lymphatic vessel
Membranous vessel that circulates lymph throughout the body.

capsule
Sac for the lymphatic ganglion.

**lymphatic vessel**

Membranous vessel that circulates lymph throughout the body.

valve
Membranous fold that keeps the lymph from flowing backward.

lymph
Translucent pale-yellow liquid produced from the interstitial liquid that accumulates in tissues.
