

endocrine system

thyroid gland

Gland secreting thyroid hormones, which regulate growth and metabolism.

anterior view**larynx**

Muscular cartilaginous duct at the upper terminal part of the trachea; it contains the vocal cords and plays a role in speech and respiration.

isthmus of thyroid gland

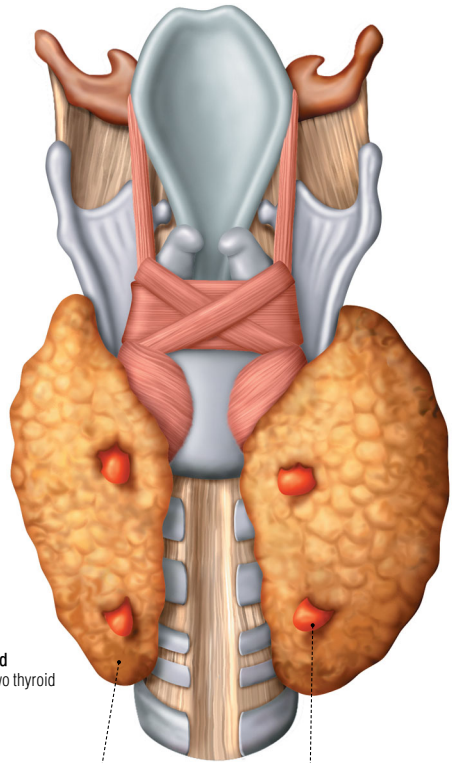

Narrow band linking the two thyroid lobes.

trachea

Muscular cartilaginous tract that is a continuation of the larynx; it allows air to pass.

lobe of thyroid gland

Each of the two main parts of the thyroid gland, located on either side of the larynx.

posterior view**parathyroid gland**

Each of two small glands on the posterior face of the thyroid gland. They secrete a hormone (parathormone) that affects calcium metabolism.
