

Klüver-Bucy syndrome **39**
 Knowledge, the (London taxi drivers) 148-149
 knowledge
 and belief 158
 and creativity 154

L

labor 91
 lamina terminals 95
 language 29, 61, 151
 and brain damage **126**
 conversation **128-129**
 and dementia/aging 52, 200
 learning **124-125**
 learning disabilities/difficulties 215
 processing 37
 reading and writing **130-131**
 language areas **126-127**, 130
 language centers 77, 136
 lateral corticospinal tract 98, 99
 lateral geniculate nucleus 68
 laughter 107, 205
 learning 32, 49
 and aging 51, 52
 and brain disorders 201, 216
 disabilities/difficulties 204, **215**
 environmental factors 61
 improving memory **142-143**
 language **124-125**
 and limbic system 38, 39
 and memory 136-137, 138, 148
 mirror neurons 102-103
 new skills 52, 100, 101, 102, 156, 215
 nonassociative 134
 perceptual 134
 reading and writing **130-131**
 and reward centers 112, 186
 and sleep 142
 left hemisphere 10, 29, 126
 lenses 66
 leptin 94
 Lewy body dementia 200
 lexical gestures 119
 Libet, Benjamin 168
 light 66, 67
 light sleep 172
 light therapy 207
 limbic loop 33
 limbic system **38-39**, 47, 78, 79, 87, 110, 171
 limbs, loss of 284
 listening 128-129
 lobes, cortex 29, 30
 locked-in syndrome 206
 locus coeruleus 137, 186
 loneliness 61
 long-term memory 135, 136, 139, 167, 173

long-term potentiation (LTP) 136, 137, 138, 139, 189
 longitudinal fissure 29
 love 48, **114-115**
 lust 114, 115
 lying **120-121**
 Lyme disease 203
 lymphatic ducts 173

M

machine learning 36, 188
 macrophage cells 202
 magnesium ions 26, 27
 magnetism 40-41, 42-43, 186, 190, 191
 male brain **58-59**
 mammals 15
 mammillary bodies 38, 134
 mandible (jawbone) 16
 mania 207
 mechanoreceptors 82
 medial frontal gyrus 123
 medically induced coma 206
 meditation 170
 medulla 32, 36, 196
 MEG (magnetoencephalography) **43**, 186
 Meissner corpuscles 83
 melanocortin 94
 melatonin 46, 93
 memory 10, 11, 26, 49, 77, 102, **134-135**
 and aging 52, 146
 and artificial intelligence **189**
 distortions 171
 emotional 38, 107, 137, 140, 147
 environmental factors 61
 false **141**
 forgetting **144-145**
 formation **136-137**
 improving **142-143**
 and limbic system 38
 long-term 135, 136, 139, 167, 173
 and nutrition 55
 problems 50, 51, **146-147**, 185, 200
 recalling 38, 139, **140-141**, 142, 144-145, 149, 167, 178
 and sense of self 178
 short-term 29, 52, 134
 and skills 100
 and smell 79
 special types of **148-149**
 storing **138-139**, 140, 142, 145
 technological enhancement 190
 and tiredness 100
 types of 134-135
 visual 71
 for words and faces 49
 memory chips **191**
 memory circuits, electronic **189**
 memory palace technique 142
 memristors 189
 meninges 16, 196, 198, 200
 meningitis **198**
 menstrual cycle 35, 196
 mental health
 brain disorders **196-217**
 teenagers 47
 mental self 178
 Merkel's disks 82
 metabolism 175
 methamphetamine 175, 212
 methylation 61
 micro expressions **116**
 microglia 21
 microphones 182, 183
 microprocessors 184
 microvilli 80
 midbrain **28**, 36, 98
 middle ear 74
 migraines **196**
 mind, brain and 162-163
 mind-body therapies **88**
 mindfulness 88
 mirror neurons **102-103**, 118
 mirror test 178
 mnemonics 142
 monism **162**
 monitoring systems **42-43**
 mood
 and brain stem 186
 disorders 47, 207
 emotion versus 111
 and nutrition 55
 morality **122-123**
 motor control 32, 33, 201, 211
 motor cortex 47, 77, 178, 184
 brain disorders 203, 204
 and emotions 110, 111, 117, 119
 and language 126, 128
 and movement 96, 98, 101, 103
 proprioception 65, 85
 motor gestures 119
 motor homunculus 98
 motor loop 33
 motor neuron disease (MND) **202**
 motor neurons 12, 98, 99, 101
 mouth
 facial expressions 117, 119
 language 126
 movement 10, 11, 29, **98-99**
 brain disorders 185, 201, 203, 204
 and cerebellum 37
 involuntary 201, 209
 mirroring 102-103
 planning **86-87**, 168
 repetitive 217
 unconscious **100-101**
 voluntary 48

movement receptors 84
 MRI (magnetic resonance imaging)
 scans **40-41**, 43, 155, 198, 202
 mucus 78
 multiple sclerosis (MS) **202**, 203
 multipolar neurons 20
 multitasking 165
 Munchausen syndrome **210**
 Munchausen syndrome by proxy **210**
 muscle receptors 85, 99
 muscles
 movement **98-99**, 168
 movement memory 96
 reflex actions 101
 spasms 203
 stiffness 201
 tensing 108
 weakness 198, 199, 202, 203
 music **60**, 77, 103, 150, 155
 mutation, genetic **57**, 201
 myasthenia gravis 203
 myelin sheaths 21, 46, 48, 50, 202

N

nano robots **190**
 nanobots, cerebral 193
 narcolepsy **205**
 nature and nurture **60-61**
 navigation 102
 near-death experiences 170, 174
 negative feedback 91
 nerve agents **23**
 nerve bundles 86, 87
 nerve signals **22-23**
 nervous system **12-13**, 98
 networks of neurons **26-27**, 61, 138, 139, 140, 144, 150, 151
 neural dust 193
 neural implants 193
 neural lace 193
 neural networks 36, **188**
 neural pathways 26, 33, 37, 59, 100-101, 136, 175, 176, 189
 neural tube 44
 neurobots 190, 193
 neuroendocrine system **92-93**
 neurofeedback **43**
 neurogenesis **49**
 neurograins 191
 neurohormones 92
 neuromodulators 244
 neuromuscular junction 99
 neurons 10, **20-21**, 28
 artificial 188
 brain development 44-45, 49
 and consciousness 163
 in cortex 30, 31
 death of 199
 degeneration 50
