

neurons *continued*
 and memory 136
 mirror **102-103**
 networks of **26-27**, 61, 138, 139,
 140, 144-145, 150, 151
 production of 60
 synchronicity of 163
 neuroplasticity **26**, 45
 neuropsychiatric disorders 190
 neuroscience 10, 11
 neuroticism 177
 neurotransmitters 20, **22-25**,
 26-27, 55, 57
 and attention 154, 164
 and brain disorders 185, 212
 and emotions 111, 112, 114
 and memory 136, 137
 and movement 99
 and personality 176
 and time 175
 nicotine 24, 52
 NIRS (near infrared spectroscopy)
 186
 nociceptors 82
 noise, filtering out 75
 nonassociative learning 134
 nonbinary brains **59**
 nondeclarative (implicit) memories
 135
 nonverbal communication
118-119, 129
 noradrenaline 24, 114, 137, 154,
 186
 nose 78, 81
 nuclei **32-33**, 36, 92, 186, 187
 nucleus accumbens 112, 113
 numerical ability 51
 nutrition 52, **54-55**

O

obsessive-compulsive disorder
 (OCD) 185, **209**
 occipital lobe 29, 30
 occipital-temporal area 131
 odors 78-79, 81
 olfactory bulb 38, 78, 81, 134
 olfactory cortex 65, 78
 olfactory epithelium 78
 oligodendrocytes 21
 omega-3/-6 fatty acids 55, 61
 openness 177
 opioids 113
 optic chiasm 68
 optic nerve 12, 66, 67, 68
 optical illusions 73
 orbitofrontal cortex 30, 78, 81, 118,
 209
 orbitofrontal prefrontal cortex 123
 organ of Corti 75
 organelles 21

organizational skills 200
 organum vasculosum 95
 ossicles 74
 outer ear 74
 ovaries 93
 overclocking 190
 oxygen 52, 199, 204, 206
 oxytocin 48, 91, 107, **114**, 115

PQ

Pacinian corpuscles 83
 packets of time 174
 pain
 brain tissue 10
 feeling **86-87**
 headaches and migraines **196**
 managing **88-89**, 186
 pain fibers 86
 pain receptors 86
 pain relief, natural 87
 pancreas 93, 94
 panic attacks **109**, 208
 papillae 80
 paracellular transport 18
 parahippocampal gyrus 38
 paralysis 199, **203**
 paraplegia 203
 parasympathetic nervous
 system 13
 parathyroid gland 93
 pareidolia 72
 parenthood **48**, 114
 parietal cortex 121, 173, 178
 and intelligence 150
 and movement 96, 97, 98, 100,
 103, 111
 parietal lobe 29, 30, 171
 and attention 164
 and intelligence 151
 and memory 134
 and morality 122
 and movement 100, 102
 and senses 70, 71, 84
 parietal-temporal cortex 131
 Parkinson's disease 33, 130, 174,
 185, 200, **201**
 parsing, in speech decoding 129
 pattern sequences 153
 Pavlov, Ivan 134
 pedunculopontine nucleus 186
 peers
 peer pressure 47
 and sense of self 179
 perception **72-73**, 162-163, 171
 of time **175**
 perceptual learning 134
 perceptual theory 175
 perfectionism 214
 periaqueductal gray 186
 peripheral nervous system 12, 36

personality **176-177**
 assessing **177**
 disorders 200, 201, 210, **213**
 PET (positron emission
 tomography) scans 41
 petit mal 197
 pH regulation 90
 phobias 109, **208**
 phonological recoding 131
 phosphates 137
 photographic memory 149
 photoreceptors 67
 phrenology 30
 physical brain **10**
 male and female **58-59**
 physical illusions 73
 physical self 178
 physiological illusions 73
 pia mater 16, 198
 pica 39
 pictures 153
 pineal gland 93, 200
 Pinocchio illusion **85**
 pituitary gland 34, **35**, 92, 93, 95,
 114, 200, 208
 placebo effect 158
 planning 101
 plaques 50, 202
 plasma 17
 plasticity 151
 pleasure 39, 113, 212
 polarization 22-23
 polygraphs 121
 pons 32, 36
 position, sense of 84, 85
 positive feedback 91
 post-traumatic stress disorder
 (PTSD) **147**, 208
 postconcussive amnesia 197
 posterior cingulate cortex 123
 posterior superior temporal lobe
 122
 postsynaptic neurons 23, 113
 posture 37, 118, **119**
 potassium ions 22
 practice, and memory 136, **139**, 142
 preconscious 169
 preference beliefs 159
 prefrontal cortex 45, 47, 102, 173,
 174, 178
 and emotions 107, 114, 121, 167
 and memory 145, 167
 prefrontal loop 33
 pregnancy 44, 147, 204
 premotor area (PMA) 96, 97, 102,
 103
 premotor cortex 31
 prenatal screening **204**
 pressure sensors 84
 presynaptic neurons 23, 113, 136
 primary auditory cortex 75, 76

primary motor area 97, 98
 primary taste area 65
 priming 134
 procedural memories 135
 progesterone 93
 proportional theory 175
 proprioception 64, 65, **84-85**
 proprioceptors 82, 84, 85
 prosopagnosia 71
 prostaglandins 86
 prostheses 182, **184**, 190
 protein transporters 19
 proteins 57, 200
 in diet 54
 protons 40-41
 psychometric testing 153
 psychopathy **123**
 psychotic disorders 170, 211
 PTSD (post-traumatic stress
 disorder) **147**, 208
 pulse 121
 pulvinar nucleus 187
 punishment **39**
 pupils 66, 108, 118
 purging 214
 putamen 33, 96, 100, 134
 quadriplegia 203

R

radial glia 21
 radio waves 41, 190
 rationality 122
 reaction pathways **100**
 readiness potential **96**
 reading 127, **130-131**, 215
 reasoning 171
 receptors
 bionic limbs 184
 crossing the blood-brain barrier
 19
 memory 136, 137
 nerve signals 22
 olfactory 78
 senses 64, 65
 smell 65
 stretch 91
 taste 65, 80, 81
 thermoreceptors 91
 touch 82, 83
 recognition 38, 70, 71, 141, 200
 red blood cells 93
 reflex actions 86, 100, **101**, 108
 regulatory system **90-91**
 rehabilitation 212
 rehearsing actions, and mirror
 neurons 103
 relationships 52
 relaxation techniques 88
 REM (rapid eye movement) sleep
 172, 173
