

10 Factory waste
polluting river.

Miss a go!

This harms plants
and animals living
in or near the river.

11

12

13 Bird reserve.
Move forward

1 more place!

A reserve gives birds
and other wildlife
a safe home.

16

15 Destroying forest.
Miss a go!

Animals and plants
that depend on the
forest may die.

17

14

18 Cycling to school.
Move forward

2 more places!

Bicycles, unlike
cars, don't pollute
the air.

19

20

21 Dropping
litter.

Miss a go!

Litter can harm the
soil, plants, animals,
and humans.

25 Leaving lights
on. Miss a go!

Electricity is often
made from resources
that can't be renewed.

24

23 Planting trees.
Move forward

1 extra place!

Trees remove waste
gases from the air.

22

26 Growing fruit and
vegetables. Move
forward to finish!

Growing your own
food saves on the
cost of getting it
to the shops.

27

You're a conservation expert!

Congratulations! You now know
much more about how you can help
make Earth a healthy and happy place.
Spread the word – tell your family and
friends, so they can help too.
