

Russia is the **largest country**
in the world, covering 11.5 per cent of Earth's surface.

**An average cloud weighs
as much as a jumbo jet**

(but this weight is spread
out over a large area).

**Deepest point
of the ocean**

is called Challenger Deep in
the Pacific. It would take 29
stacked Empire State Buildings
to reach the bottom.

1.4 billion

This is the number of
people in China today
– the same number that
were in the whole world
150 years ago.
